## // ELEGANT DESIGN

The fire windows have the same look and design as our other façade doors and windows.

## // OPTIONAL TYPE OF WOOD

The windows are supplied in a type of wood of your own personal choosing. However, the only requirement is that the preferred wood species is heavier than pine wood.

## // INTEGRATED ELEMENTS

The fire windows can be built together as entire glass walls at infinite length.

## // PROFESSIONAL CALCULATION

We should be happy to make our expertise available to you and help you find the optimal solution in accordance with current legislation

## // EASY MAINTENANCE

The outer aluminium part ensures a long life and minimal maintenance.

## // NOISE REDUCTION

Excellent noise-reducing properties ensure peace and quiet indoors even if the nearest neighbour is a very busy road.

## // GREAT FLEXIBILITY

The window is made of wood or a combination of wood/aluminium with adhesive bars of varying widths.

## // BR 2018

Our production facilities have been certified according to EN 16034 and comply with the new requirements of the building regulations effective as at 1st November 2019

## // TESTET AND APPROVED SOLUTIONS

The fire windows meet the strictest requirements and have been tested at The Danish Institute of Fire and Security Technology.
