Up to 40 db Rw+Ctr

U-value for the entire window:

As from 0,75 W/m²K

Materials:

Oak

E_{ref}:

4,0 kWh/m²/year

// DESIGN, QUALITY, AND FUNCTIONALITY

KRONE EG are exclusive oak windows with a beautiful design, of the highest quality, and with high functionality. We use European oak in these windows, with only small knots and beautiful grain patterns.

// QUALITY THAT LASTS

KRONE EG is very hard, dimensionally stable, and resistant, making it the optimal choice for windows and doors.

// SUSTAINABILITY AT THE HIGHEST LEVEL

We are fully focused on utilizing all wood from the forest, even the shorter pieces. This ensures maximum utilization of the wood and significantly reduces the amount of discarded wood.

// DESIGNED FOR ANY CONSTRUCTION

KRONE EG are classic windows that fit both new construction and renovation.

// FIRE SAFETY

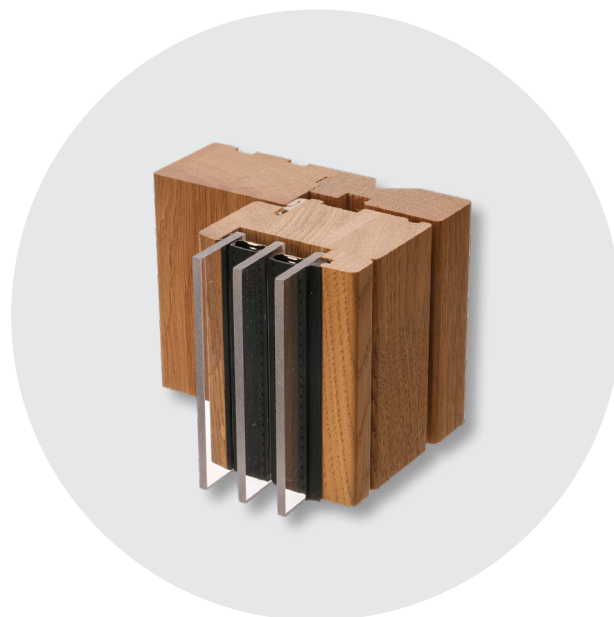

The windows can also be delivered as fire elements, complying with EI30-60. The windows maintain their elegant design, and at the same time, fire windows with fixed frames are identical to regular windows.

// CHILD SAFETY

As with our other windows and doors, we naturally offer child safety features, ensuring everyone is in safe hands.

// BURGLARY PROTECTION

The windows can be delivered with extra burglary protection to keep unwanted guests out.
